

Minimum Technical Requirements

Hardware & Software Requirements

- Able to load as a local install & run efficiently via Citrix (Citrix Preferred)
- Current Citrix Version – Client version 12.3.08.
- Current Windows Version – Windows 7 (mix of 32bit and 64bit) & Windows 8 (mix of 32bit and 64bit)
- Should never need Admin rights to run an Application.
- Needs to be compliant with MAC OS —MAC OSX 10.7 and above
- MSI packages and .exe provided for installation.
- If the software is required to be installed on a server ideally we would want it to be server 2012 R2 compatible, but Windows Server 2008 R2 at a minimum.
- Current Citrix version is XenApp 6.5 but again this should be a minimum.
- Any application to support Roaming Profiles.

Security & SOX Requirements

- Active Directory (AD), integrating Single Sign On.
- If Web based, needs to be encrypted (SSL)
- All passwords need to be encrypted and follow SOX guidelines (capital letter, number, lower case) and automatically asked to change every 60 days.
- In built auditing and logs.
- URL should be randomised.

Additional Requirements

- Time period for software to be upgraded and tested when new versions of Citrix are released with notification given to Agency.
- API integration.
- File delivery to a FTP site – both supplier and agency hosted.
