

Third Party Software Suppliers

- Share your technology/development roadmap with the MFA Systems committee prior to undertaking any work to ensure you receive feedback from the group.
- We recommend you outline what your support and training capabilities for all states.
- Be aware of hardware/software minimum standards and technical requirements for the group (refer to appendix).
- Security features and admin requirements .
- Adaptability of software, e.g. scalability, ability to adapt to change, development process, development roadmap – short and long term vision.
- Ability to integrate with other systems, e.g. export/import functionality, APIs.
- How your system fits with or improves industry workflow. As an example, refer to 'life of a spot' document (refer to appendix)
